

Meet the challenges  
in  
several bacterial  
infections

Also available  
**COBY** Dry Syrup  
Cefpodoxime Proxetil 50 mg./5 ml.

# COBY TABLETS

Cefpodoxime Proxetil 50DT/100/200 mg.

- ▶ Proven superiority over cefixime, co-amoxycylav, cefaclor
- ▶ Ensures higher efficacy in tough infections
- ▶ Useful alternative to parenteral therapy
- ▶ Effective in Pharyngotonsillitis
- ▶ Promising results in Typhoid Fever  
"promising molecule in paediatric typhoid fever because of its excellent activity against Salmonella species"
- ▶ Similar spectrum to parenteral ceftriaxone in LRTI

The Ind. Journal of Paed. 2004; Volume : 71; Issue :5; pg. 413-415

### In otitis Media

Shorter duration of therapy than  
Co-amoxycylav

Fulton B. Paediatric drugs 2001 3(p): 137-50
